Atlas Copco and Mafi-Trench: Together in Houston

As key industry players head to Houston in September, it will be roughly one year to the day that Mafi-Trench Company joined Atlas Copco Gas and Process. Over the past six months, the two companies have independently been busy attending trade shows around the globe, but the Houston Turbo Show – between *September 8 and 11, 2008* – will mark the first time the two will attend a key event together.

“We will head into Houston, side by side. This is a crucial step in the integration process we initiated last summer,” says Dré Schmitz, President of Atlas Copco Gas and Process.

“We will show first hand in Houston that Gas and Process and Mafi-Trench we can cover all bases for our customers, and all needs.”

Gas and Process and Mafi-Trench will have separate booth presences at the event, but create synergies, cohesion and interaction on all fronts, says Schmitz. Also, the two booths will be next to one another, enabling easy customer access to both companies.

By users, for users

The Houston Turbo Show – officially known as the 37th Turbomachinery Symposium – takes place at the George R. Brown Convention Center. The Symposium is widely recognized as a premier platform for global leaders from the power generation business and the rotating equipment industry. Also, it is the world’s only get-together organized by the users, for the users.

Atlas Copco is a world leading provider of industrial productivity solutions. The products and services range from compressed air and gas equipment, generators, construction and mining equipment, industrial tools and assembly systems, to related aftermarket and rental. In close cooperation with customers and business partners, and with more than 130 years of experience, Atlas Copco innovates for superior productivity. Headquartered in Stockholm, Sweden, the Group’s global reach spans more than 150 markets. In 2005, Atlas Copco had 27 000 employees and revenues of BSEK 53 (MEUR 5 600). Learn more at www.atlascopco.com.

Gas and Process is a division within Atlas Copco’s Compressor Technique business area. It develops, manufactures and markets large, customized gas and process compressors and turbo expanders, as well as their respective aftermarket products. Its products are used primarily by the oil and gas, chemical/petrochemical process and power industries worldwide, and also by industries that specialize in gas production through air separation. The divisional headquarters and main production center is located in Cologne, Germany.
